

# **Defoamer** For foam reduction in dirty water tanks

- Anti-foaming concentrate resistant to cold and hot water
- Prevents excessive foaming in cleaning machines

## Area of application

For the defoaming of dirty solution in wet vacuum cleaners, scrubber dryers and spray extraction machines.

## Application

Please test on a small inconspicuous spot before first application. Shake well before use.

#### Defoam:

Turn the vacuum on and spray a few squirts into the suction hose. In the case of large scrubber dryers, add 100-200 ml diluted with 1-2 L of water into the dirty water tank, depending on the dirty water tank volume. Consumption: no indication possible.

#### Note

Kiehl accepts no liability or responsibility for damage caused as a result of incorrect use or application of the product. Not a consumer product according to 1999/44/EC Art. 1! For professional use only!

### Ingredients (according to 648/2004/EC)

Aqueous antifoam emulsion, preservatives (Benzisothiazolinone). pH value (concentrate): approx. 11
