

Flexible  
mop frame

A complete solution for effective  
cleaning of flat and curved surfaces

# EasyShine Kit

# EasyShine Kit

For windows, mirrors, stainless steel and more  
- with flexible mop frame for curved surfaces.

The Vikan EasyShine Kit is a complete solution for cleaning a variety of surfaces. It takes efficacy and ergonomics to a whole new level with a telescopic handle that can be extended to 140 cm, and a flexible mop frame which bends perfectly and lets you clean challenging curved surfaces just as fast and easily as flat ones.

## EasyShine Kit is perfect for:

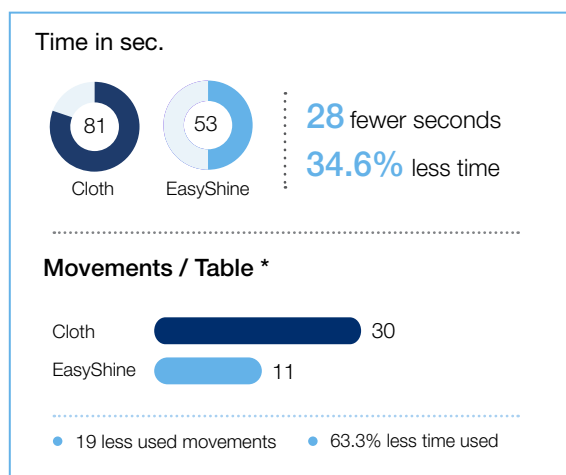

- High gloss surfaces
- Windows and mirrors
- Tiles and bath tubs
- Stainless steel (elevators, refrigerators, etc.)
- Flat and curved surfaces
- Perspex/Plexiglas/Acrylic Screens
- Touchpoints and table tops
- White boards

The Vikan EasyShine Kit utilises Vikan's latest ultramicrofibre technology that enables cleaning down to a microscopic level. 70% finer than traditional fibres, ultramicrofibres remove harmful bacteria, fingerprints, grease and dirt – using only tap water. The result is an outstanding deep clean with no chemical residue.

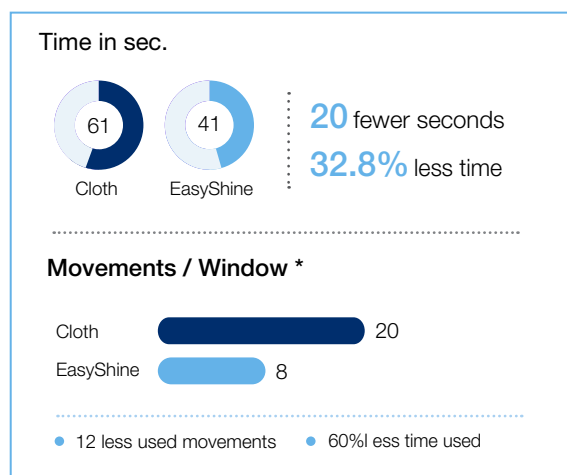

## Save time and effort

In comparative testing against a traditional cleaning cloth on various surfaces, we found that the EasyShine kit saves employees both time and effort. Our internal testing suggests that users can experience upward of 30% savings in time, and 60% savings in movements.
