

ARENAS-impregna

Liquid impregnation agent for textiles

- ▲ Water-repellent, oil-repellent and dirt-repellent finishing product
- ▲ For the initial and subsequent impregnation of natural and synthetic textiles
- ▲ Hydrophobic effect immediately after drying at room temperature
- ▲ Preserves the fabric's breathability
- ▲ Free from substances containing fluoride

Area of application

For impregnating natural and synthetic textiles, e.g. workwear, horse blankets, tarpaulins etc.

Application

Impregnation in the washing machine:

First impregnation 90 ml/kg of laundry, subsequent impregnation 20–50 ml/kg of laundry. Add the product to the final rinse cycle of the wash, temperature 20–30 °C, contact time 20 minutes, low spin speed. Attach the canister to the pump connection for the impregnation liquid. Dosage takes place automatically through the washing machine's program control. The impregnating effect will be enhanced by adding ARENAS-formacid to the impregnating solution.

Impregnation by immersion method:

First impregnation 90 ml/kg of laundry, subsequent impregnation 20–50 ml/kg of laundry. Use a suitable container for the impregnation solution. Submerge clean and dry textiles in the solution for 20-30 minutes. Then gently wring out textiles and dry at room temperature.

Manual impregnation:

Ensure complete coverage. Then leave the textiles to dry thoroughly. The amount required depends on the absorbency and the size of the fabric.

The impregnating effect fully develops by tumble drying or ironing (please observe care label).

Note

Kiehl accepts no liability or responsibility for damage caused as a result of incorrect use or application of the product. Not a consumer product according to 1999/44/EC Art. 1! For professional use only!

Ingredients (according to 648/2004/EC)

Polymer-based active substance, preservatives (Phenoxyethanol).
pH value (concentrate): approx. 5

pH value (ready-to-use solution): approx. 7
