

Duo r-Wall & Interior mop

Cleans whiteboards, chalkboards, walls, and furniture – quickly, efficiently, and stylishly

Product description

Sweep Duo r-Wall & Interior mop is a double-sided microfiber mop made from recycled materials, offering excellent cleaning performance and durability. The mop distributes moisture with unprecedented evenness, and color-coding capability is included as a standard feature.

Usage area

Sweep Duo r-Wall & Interior mop is suitable for all environments. It feels at home everywhere - from schools, daycares, and offices to hospitals and hotels. It cleans efficiently a variety of surfaces, such as whiteboards, tiled and wooden surfaces, walls, boards, tables, and other large furniture. Its 35 cm working width is ideal for wiping horizontal, vertical, and furniture surfaces.

Benefits in use

✓ **Efficiency** - The mop is double-sided, allowing you to clean more compared to a single-sided mop. With this mop, you can clean all hard horizontal, vertical, and furniture surfaces. Thanks to its high-quality microfiber material, it effectively lifts and traps dirt.

✓ **Economy** - Thanks to the double-sided design of the Sweep Duo system, cleaning is faster and fewer mops are needed. This results in lower operating costs, initial investment, and washing expenses compared to single-sided mops.

✓ **Ergonomics** - Sweep Duo r-Wall & Interior mop glides effortlessly over surfaces thanks to its low friction. When used with a short adjustable handle, it provides an ergonomic working position that reduces strain on the body.

✓ **Maximized footprint** - Sweep Duo r-Wall & Interior mops are manufactured in Salo, Finland. Thanks to efficient distribution channels, CO₂ emissions are kept to a minimum.

✓ **Maximized impact** - By using the product correctly, you can maximize its effectiveness. We support our customers in this, and with the help of our instructions, you can, for example, minimize the use of water and detergent, which also extends the product's lifespan. Together, this creates a positive environmental impact.

Usage

Use with the Sweep r-frame 35 cm and the Sweep adjustable handle. Suitable for dry, damp, or moist cleaning in all environments and on all hard, flat surfaces. It is particularly effective for removing stubborn dirt. Pre-moistening of the mop is recommended.

Damp: 0.5 dl per mop

Moist: 1 dl per mop

Maximum washing temperature: 95°C; washing is recommended at 60°C.

Interior mops and floor mops should be washed separately.
